

# MARTIN RAFFONE'S WARM MODERNISM

“HIS BRAND OF WARM & ELEMENTAL MODERNISM, SOOTHES THE SOUL AND THE EYE”

**MARTIN RAFFONE** has, over the past twenty years, researched and developed a unique creative language inspired by his love of travel and influenced by the most minute; the texture of a fabric, the weave of a carpet, grain of wood to the unique form of a

piece of furniture. From this creative global palette he weaves from the simplest and most humble of materials highly sophisticated interiors. The outcome is simultaneously smart, challenging, organic and simply elemental. Each project's success is the result of the carefully considered practicalities of daily living coupled with his enthusiastic and ongoing exploration of the visual world that surrounds him. Raffone's design activity

connects his client's to the world through a process of visual play and exploration.
